

II/2025

Dear fellow air cargo enthusiasts,

The first quarter of 2025 was a real roller coaster! The unexpectedly low seasonal drop after the holiday season and during the Lunar New Year generated significant YoY growth. In Prague, we saw a 23% increase in cargo transported by air in the first quarter of the year.

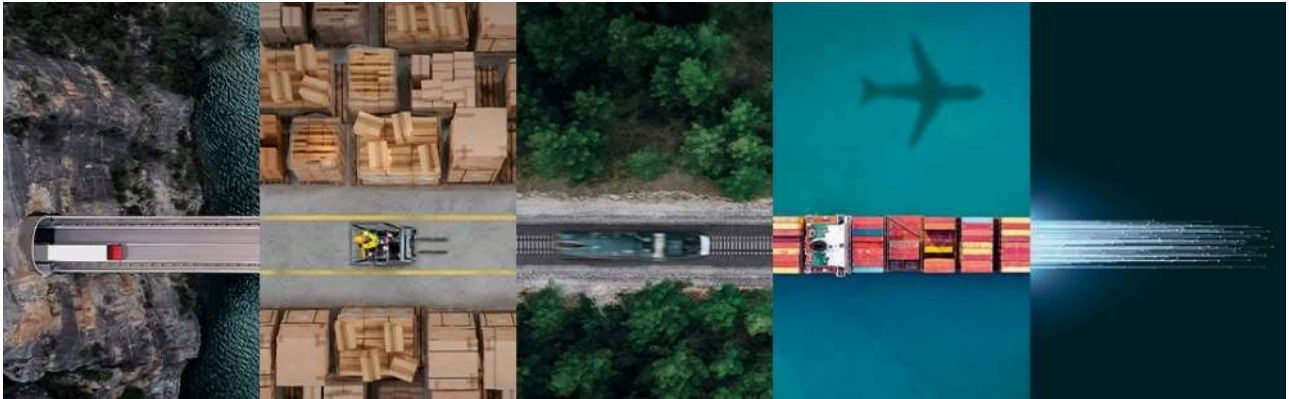

But we can't be too optimistic. Global geopolitical tremors might have significant impact on international trade and therefore air cargo business itself. Once again, our business proves to be dynamic, and we need to be ready for everything. Let's proceed with the good work and enjoy our fast-paced industry.
