

PROHIBITED ITEMS

	Carry-on Baggage	Checked-in Baggage
Laptops, cameras, music players, mobile phones, tablets		
Gels and liquids		
<small>* up to 100 ml - see details below chart</small>		
Medicine in a liquid form and baby food for the time of travel		
Knives and scissors with blades shorter than 6 cm (excluding automatic knives)		
Tools (drills, hammers, screwdrivers, keys, etc.) and medical tools		
Firearms and their imitations (paintball, airsoft, starting, gas, etc. guns), ammunition **		
Hockey sticks, golf clubs, ski poles, walking sticks and canes, fishing rods, paddles		
Explosives and booby traps, detonators, fireworks		
Acids, corrosives and flammables		
Pressure containers and gases (e.g.: propane-butane, pepper sprays, etc.)		
Solid and liquid flammables, radioactive, toxic and infectious agents		
lithium batteries and devices that contain them ***		

* All containers with gels and liquids must be placed in a re-sealable transparent plastic bag with a maximum content of 1 litre and removed from the carry-on baggage prior to the security check.
** In line with relevant regulations and carrier's transport conditions.
*** If in doubt regarding the transport options, please contact the airline.

It is the unconditional right of the security check personnel to declare as prohibited additional items not listed above, but raising legitimate suspicion of posing a threat to the safety of civil aviation.

Ten Steps to Ensure Problem-free Airport Security Screening

1. Review the aviation security standards before going to the airport, and in case of any uncertainties contact your airline or the airport information desk.
2. Arrive at the airport allowing enough time for smooth baggage check-in and security screening.
3. Wait for your turn at the security screening area patiently. Follow the instructions and directions of the security personnel and stay within the outlined corridors, enabling smooth security check flow.
4. Remove the re-sealable plastic bag containing gels and liquids from your carry-on baggage.
5. Remove larger electronic devices (laptops, etc.) from your carry-on baggage and place them in the provided plastic tray.
6. Place your carry-on baggage on the X-ray machine conveyor belt.
7. Place all items with metal parts, e.g. mobile phones, keys, cigarettes, coins, valets, etc., in the provided plastic tray.
8. Remove your top layer of clothing and place it in the plastic tray (coats, jackets, etc.).
9. Wait for the security officer's instruction to proceed through the frame metal detector. Accept any request for additional check calmly as it is not personal, but a part of the standard routine.
10. Your carry-on baggage and items placed in the provided plastic trays will be subjected to an X-ray check. If the security officer asks you to open your baggage or submit any of the separately screened objects for additional check, please do so without any objections, providing due cooperation. Collect all your belongings upon completion of the security screening process.

AIRPORT SECURITY RULES

DETECTION CHECK INSIDE LUGGAGE

Within the enhancement of safety measures, the security personnel of the Prague Airport will perform detection checks inside the selected checked-in luggage starting from 01.05.2017. During this process, some luggage is **opened and checked physically**. This process is to prevent loading explosive substances into the cargo space of the aircraft. The Prague Airport thus proceeds in compliance with the EU legislation in effect.

Physical check is carried out under very strict safety conditions. The whole procedure is documented and electronically monitored.

Wrapped bag that has been inspected

TSA lock

When the luggage is opened, it might be damaged irretrievably, in which case please contact baggage claims in your target destination. We beg to advise you that according to Regulation (EC) 2027/97 of the European Council, the written claim must be made to your air carrier within seven days. As a provisory solution, the security personnel shall secure the luggage for further travel using a foil and safety strip and apply tightening straps to the damaged luggage.

To prevent possible damage to your luggage during detection check, please use a luggage with TSA locks (indicated with red diamond) or padlocks or wrapping foil.

For more information on checked-in luggage checks please visit www.prg.aero/control or call: +420 220 111 888.

EU SECURITY STANDARDS REGARDING LIQUIDS AND GELS

Liquids quantity limits upon transport in carry-on baggage apply to all passengers, flying from EU countries or transferring via EU countries. Liquids purchased inside the airports' restricted areas (after passport control and security screening) are exempted from these regulations.

Liquids that can be transported in cabin baggage, subject to the individual containers' size **LIMITATIONS**

Liquids and gels for everyday use (cosmetics, food, etc.) in containers with a maximum capacity of 100 ml.

- The above listed gels and liquids may be transported only:
- In containers with a maximum capacity of 100 ml, placed in a re-sealable transparent plastic bag with a maximum content of 1 litre
 - If removed from the cabin baggage to be presented separately for security screening

Unless the liquids and gels are presented for security screening in the above described manner, their transport will not be permitted.

Liquids that can be transported in cabin baggage **WITHOUT LIMITATIONS** on size of the individual containers

Baby formula and baby food for the period of travel

Medicine and diet food for the period of travel

Intact Security Tamper Evident Bags (STEBs) from airport shops

With regards to medicine and diet food for the time of travel, it is recommended to always carry a prescription or doctor's note.

The above listed gels and liquids will only be permitted for transport in cabin baggage if they pass the airport security screening.

PASSENGER SECURITY SCREENING INSTRUCTIONS

Laptops, liquids and gels, and any large electronic devices must be presented separately for security screening.

Please remove and place to the provided tray your top layer of clothes, head cover, and the contents of your pockets - all metal and non-metal objects.

Place all your pieces of baggage on the conveyor belt for security screening one by one.

Wait to be prompted by the security control worker to proceed through the metal detector.

DID YOU KNOW...

that your phone,

laptop,

and other
electronic
devices

...contain
lithium
batteries?

that
lithium
batteries

and
e-cigarettes

...are
dangerous
goods?

that if
lithium
batteries
are damaged
or short
circuited

they can
start a fire?

Do not
put them
in your
checked-in
luggage

Carry them
with you

The information on security standards listed herein constitutes a brief summary of the elementary rules only. For detailed information, please contact the information desk, talk to the staff of the Václav Havel Airport Prague security, or go to: www.prg.aero.
