

## Milestone 1 implementation

To the attention of **Airlines Operations Center**

With effect from 31/03/2019, the correlation check of filed ATC flight plan (EOBT) and airport slot (SOBT) will be practiced. Where discrepancies are noted in these checks (EOBT does not belong to interval **<SOBT + 0 MIN; SOBT + 10 MIN>**), the flight is not added to the departure sequence calculation. Subsequently, an appropriate stakeholder is alerted by an automated e-mail and EOBT or SOBT update is needed.
