

Earlier departure in accordance with CDM procedures

To the attention of **Ground Handlers and Flight Crews**

If TOBT is set to the value of **EOBT-10min** (10 minutes earlier than filed flight plan) and the flight receives TSAT to this value, then start-up/pushback permission can be obtained **up to 15 minutes before EOBT!** It is against LKPR procedures to contact TWR with start-up/pushback request outside of TSAT tolerance window <TSAT-5min; TSAT+5 min>.

In case of departure intended **before EOBT-15min**, it is necessary to **cancel/refile ATC flight plan (EOBT)**, **re-coordinate the departure slot (SOBT)** or both.
